

# LabPrints LP

The digital photographer's best friend.

## Introducing the LP Image Aligner from LabPrints

### Merging photos just got better...

Fisheye view. Note the perspective distortion, including the foreground dominance.

Wide angle (24mm equiv.)  
Doesn't look very wide!

Here's a full 180 degree view made up of the 7 images below...with perfect alignment!

Now you can do even MORE with LabPrints! Stitch your photos together to create a single seamless wide field of view image.

LabPrints software offers a complete and seamless solution to the professional photographer's workflow. Find out how our storefronts and software solution will make your life easier! Plus, use your preferred lab for complete control.

Previously exclusive to the  
medical imaging and defense  
industries... NOW available to  
LabPrints users!

*LP Image Aligner, powered by i2Align, is  
one of the industry's most sophisticated image  
processing tools. Innovative and powerful,  
increase your field of view in minutes!*

#### It Doesn't Matter:

- Shoot without a tripod
- Shoot L to R, R to L, up and down
- Use any lens

#### Pricing:

*\$89 Introductory Price*

#### How It Works:

So easy! Take your overlapping photos--plug into the LP Image Aligner and create a beautiful SINGLE image.

LP Image Aligner is unlike any application you have ever used. Create panos, montages, high definition, high dynamic range or wide angle imagery. LP Image Aligner makes it easy with image recognition & registration technology so advanced--it's automatic.

More than automatic, LP Image Aligner is intuitively flexible, recognizing differences and combining similarities--even if the images were taken from different cameras, different sensors, of varying resolution, in different modalities, at different distances, and at different times.

Utilizing technology used by NASA, the LP Image Aligner is the NEW industry leader when it comes to image merging. You will not find a better or easier solution!

And, of course it is seamlessly integrated with all LabPrints software and services. Just another way to save time and increase sales...with Labprints!

#### Why You Need It:

- Create stunning album panoramas without risking image distortion
  - interior ceremony photos
  - wedding party and family groups
  - creative couple portrait composites
- Offer incredible gallery wraps to your customers
- No need for fish eye lens to capture super wide field of view
- Senior portrait composites
- Dramatic scenic landscape photos
